British Standard 8300:2009, Building Regulations 2000 Access To and Use of Buildings (2004 Edition)

Bespoke Products

We normally deal with three sorts of bespoke requests, product variants, new/bespoke designs and non-standard colours. These products due to their bespoke nature may incur additional engineering charges, but we will make these charges clear in your quotation.

Product Variants

The most common request is for a variation to an existing product. This includes minor specification changes for example - a little longer grab rail, a slightly different angle or a change of position to the fixturing. In most of these cases we can provide an answer same day, and the price is likely to be similar to our standard product ranges.

Bespoke Design

Using our flange and tube system we have the ability to bend, add flanges and add ribbing which means we can manufacture any number of bespoke configurations. Working with our designers you can commission a completely unique rail to fit your scenario.

Bespoke Colours

We are able to manufacture most of our products in a RAL colour of your choosing. For any RAL colours other than White RAL 9016 and Blue RAL 5011 there is a coating surcharge of £20 for small quantities. Where this applies you will be advised at the point of ordering. Larger quantities will not attract any coating surcharge.

RAL Colours

This list is not exhaustive, please contact us if the required colour is not listed.

RAL 1004 Dark Golden Yellow	RAL 1007 Chrome Yellow	RAL 1018 Zinc Yellow	RAL 1023 Traffic Yellow
